

**STABILIZATION OF COSMETIC OR DERMATOLOGICAL FORMULATIONS COMPRISING  
REPELLENT ACTIVE COMPOUNDS**

**Abstract of the Disclosure**

- 5       Cosmetic or dermatological formulations having at least one repellent active compound, have the stability of the repellent active compound stabilized, allowing for higher concentrations of repellent active compound, through the addition of at least one dialkyl naphthalate having the structural formula

- 10       wherein R<sup>1</sup> and R<sup>2</sup> independently of one another are selected from the group consisting of branched and unbranched alkyl groups having 6 to 24 carbon atoms.
